

Chapter 25

Mobile Devices

Episode 25.01

Episode **Maintaining Mobile Devices**
title:

Objective: 220-1202 3.3 Given a scenario, troubleshoot common mobile OS and application security issues

Lower 3rds

Start Mobile Security Troubleshooting by
Verifying OS & App Updates

Developer Mode (macOS) & Developer
Options (Android) Can Expose Devices

Unauthorized or Malicious Apps = Major
Security Risk

App Spoofing = Fake Apps Tricking Users or
the OS

Mobile Device Security Risks

Stay Updated – OS &
apps must be current

Mobile Device Security Risks

Developer Mode Risk –
Use only when needed

Mobile Device Security Risks

Malicious Apps – Avoid
untrusted sources

Mobile Device Security Risks

App Spoofing – Watch
for fake or masked apps
